A wounded soldier's journey can go from the battlefield to a field hospital at Balad Air Base — about 60 miles north of Baghdad — and then to an army medical center in Landstuhl, Germany, all in a matter of hours.

MILITARY IMPACTS

Mortality rates drop from past to present

Improved body armor, medical care cited

By Otto Kreisher
COPLEY NEWS SERVICE

October 31, 2004

WASHINGTON — On average, two U.S. troops die every day in Iraq and almost 15 are wounded.

The war's 7-1 ratio of injuries to deaths is much higher than in past U.S. combat experience, where it ranged from 2-1 in the earliest conflicts to better than 2-1 in Korea and Vietnam.

Experts attribute the lower mortality rates to several factors, including the nature of the threat, the stronger body armor being worn by U.S. forces and improved battlefield medical care.

In 18 months of conflict, 1,106 U.S. personnel have died in Iraq from combat action or accidents and 8,150 Americans have been injured, according to Pentagon statistics as of Friday.

During the intense first six weeks of the allied ground assault in March and April 2003, the ratio of wounded to killed was at traditional levels of 2-to-1 and 3-to-1.

After major combat operations were declared over on May 1, the ratio shifted to the current level of roughly 7-to-1. About 90 percent of all U.S. casualties have occurred since then and shrapnel from bombs has been the primary cause.

The deadly effect of those crude but powerful weapons is "the better body armor," said Navy Capt. Steven Yowell, the Bureau of Navy Medicine.

Because of the protection afforded by the bulky "flak vest" and helmet, "the serious chest-and abdominal-wounds percentage has dropped," Yowell said. While there can be "significant bleeding" from the unprotected groin and arm pits, "it's not as immediately threatening as wounds to the chest."

The next major factor in the survival rate is improved battlefield medical care.

Joint Staff

Chairman: ADM Mike Mullen, USN

Vice Chairman: Gen Jim Cartwright, USMC

Director: LtGen Austin, USA

Vice Director: MGen Walt Gaskin, USMC

J1: Personnel
BG Patton, USA

“3 Block War”

Security ↔ Governance

CONTINUING PROMISE 2009

MISSION

Deploy USNS COMFORT (T-AH-20) to AOF to conduct HA training for U.S. Forces

Train with international military medical personnel, U.S. government agencies, regional health ministries, NGOs and U.S. academic institutions in preparation for HA/DR operations

Send a strong message of continued U.S. support and commitment

Countries visited: 7 (Haiti, Dominican Republic, Antigua & Barbuda, Panama, Colombia, El Salvador and Nicaragua)

Encounters for Deployment: 410,284
Patients for Deployment: 98,061

NGO participation: Food for the Poor, International Aid, Latter Day Saints Ministries, Operation Smile and Project Hope, representatives from the Univ of California-San Diego Pre-Dental Society, Univ of Miami, and other in-country groups (medical student translators)

Additional support: Lions Club, Nour International Relief Aid Foundation, Rotary Club, Haitian Resource Development Foundation, Hugs Across America, The Wheelchair Foundation, Rabies Control Partnerships, Institute of the Americas, International Aid, Agua Viva, and Paul Chester Children's Hope Foundation.

Partner nation support: Antigua, Canada, Dominican Republic, El Salvador, France, Panama, the Netherlands, and Nicaragua

China's PLA(N) sent 3 medical personnel to observe operations in Tumaco, Colombia.
